Mr. Dan Petrillo
P.O. Box 1523
Broomfield, CO 80038

September 12, 2007

Mr. Petrillo,

Our manufacturing facility is located on a hilltop by Jefferson County Airport. Over the years we have experienced numerous lightning strikes as well as surge problems associated with public service.

We had Total Protection Solutions surge protection units installed for all our CNC machines 4 years ago. We experienced a direct lightning strike to one of the transformers feeding the shop and did not lose a single piece of equipment.

We are currently installing surge protection units for our computer system and phone system.

I believe the surge protection system has paid for itself in a short time.

Sincerely,

Clete Zakrzewski
Knudson Manufacturing
